

ANONYMIZED SAMPLE RESUME

Computer Science Engineering Student

Career Objective

Aspiring Software Developer and second-year Computer Science Engineering student with hands-on experience in Java, SQL, and web development. Building practical projects using modern technologies and improving problem-solving skills. Seeking internship opportunities to apply technical knowledge and gain practical experience.

Education

Bachelor of Engineering (B.E.) in Computer Science & Engineering — 2024–2028
CGPA: 7.9

Pre-University — 2022–2024
Percentage: 85

Matriculation — 2021–2022
Percentage: 85.6

Skills

Programming Languages: Java, C, Python (Basic)
Web Technologies: HTML, CSS
Databases: SQL
Core Fundamentals: Operating Systems, Database Management Systems (DBMS)
Tools & IDEs: VS Code, Eclipse, Jupyter Notebook

Projects

Student Information System

Technologies: Java, OOP, ArrayList
Developed a console-based application to manage and retrieve student information. Used ArrayList to manage student records and implemented search, add, update, and delete functionality.

ESP32 Air Mouse (Handheld Remote IoT Project)

Technologies: Arduino, ESP32, IoT
Developed a handheld air mouse using ESP32 to control cursor movement through hand gestures. Integrated motion sensors and wireless communication for real-time interaction.

Certifications

AI & Modern AI; Cybersecurity Fundamentals; Cryptography; Cybersecurity; Data Science; Claude Code in Action; AI Fluency Framework & Foundations; Introduction to Model Context Protocol; Introduction to Unix.
